

ARCHITECTURAL ASSISTANT

Lépine is an industry leader for the development of new luxury residential rental properties. We are leading the way in creating a refreshing standard of living, unique in today's rental markets and we are pushing the boundaries in designing efficient buildings, and building efficiently. We create high value, premium rental properties from the ground up and control every step of the process. This rigorous attention to details is integral to our success.

We are looking for a talented, dynamic individual experienced in AutoCAD and Revit, to become part of our in-house design team. The Lépine in-house design team works in close cooperation with our professional consultants (architects and engineers) to design and supervise the execution of our new buildings.

The principal responsibilities of the candidate will be:

- Strong knowledge of MEP systems for residential high rise
- Good knowledge of Building Automation Systems
- Good working knowledge of MEP construction code
- Excellent at organizing work
- Ability to estimate work progress
- Basic computer skills (emails, Word, Excel)
- Strong English written and spoken skills are essential

Ideally, the candidate should possess a diploma in architecture and master the AutoCAD and Revit design tools. Strong English written and spoken skills are essential; French skills are an asset.

This position provides a candidate with a rare opportunity develop a broad expertise in residential mid-rise construction.

Candidates should send their resume to careers@lepinecorp.com.

We would like to thank all those that apply, however only those selected for an interview will be contacted.
