

ELECTRICAL/MECHANICAL TECHNICIAN DRAFTSPERSON

Lépine is an industry leader for the development of new luxury residential rental properties. We are leading the way in creating a refreshing standard of living, unique in today's rental markets and we are pushing the boundaries in designing efficient buildings, and building efficiently. We create high value, premium rental properties from the ground up and control every step of the process. This rigorous attention to detail is integral to our success.

We are looking for a talented, dynamic individual experienced in AutoCAD and Revit, to become part of our in-house design team. The Lépine in-house design team, in close cooperation with our professional consultants (architects and engineers), plays a leading role in the design and construction of our new buildings.

The principal responsibilities of the candidate will be:

- Contribute to the electrical and/or mechanical design building systems
- Prepare AutoCAD and Revit MEP drawings
- Coordinate designs with other disciplines (civil, architectural, structural)
- Investigate new product and design options
- Validate shop drawings

Ideally, the candidate should possess a technical degree in electrical or mechanical design and master the AutoCAD and Revit design tools. The candidate will be required to produce drawings that are well thought out, complete, detailed and correct; so we are looking for a conscientious individual with solid work ethics. Strong English written and spoken skills are essential; French skills are an asset.

This position will provide the candidate with a rare opportunity develop a broad expertise in residential mid-rise construction.

Candidates should send their resume to careers@lepinecorp.com.

We would like to thank all those that apply, however only those selected for an interview will be contacted.
